

OLEVI Advanced Skills Teaching Assistant Award

Classroom support staff will become more reflective, confident and creative through gaining a deeper understanding of classroom pedagogy. You will develop the attributes to make a significant impact on the relationships with both pupils and colleagues.

This programme consists of 6 focused sessions with a series of post session challenges, completed over a 12 month period. The sessions are run over 3 hour sessions. The programme has been designed for delivery online and/or face-to-face. The accreditation process will involve a knowledge test and two professional discussions with the assessor around your key learning and achievements.

As well as achieving this OLEVI Award, you will receive a L3 qualification. Full attendance at this programme will enable you to lead a project to improve an aspect of teaching & learning; role-model effective learning processes to others; and engage in the delivery of internal focused CPD.
